## Real World Solutions

### Minimize After Hours Call-Ins with Interlock Faceplates

Due to the complex nature of industrial process applications, the operation of one device frequently depends on the status of one or more other devices. These interlocks can often be difficult for operators to trace. Implementation of an interlock faceplate can alleviate this frustration by:

- Providing operators direct access from the plant floor to view device interlocks that are holding a piece of equipment from being started.
- Presenting electricians with exact PLC address for troubleshooting.
- Increasing operator independence and decreasing the number of after hour call-ins for maintenance/contractors/technicians.
- Reduce need to jumper interlocks in the PLC using the interlock bypass feature.
- Decrease time spent to get equipment back up and running.

## Thanks for Joining us

### Walk for Heart and Stroke

We would like to take this opportunity to thank everyone who came out and joined us in the Niagara [Cheerios Mother Daughter Walk for Heart and Stroke](#), which took place on September 21 in St. Catharines.

**What a great day!** The sun was shining, and it was a great day for a walk along the Welland Canal. Jordan Engineering was pleased to be able to welcome more than 20 walkers on our corporate team, and is even more pleased to announce that together, we raised \$2,380 for Heart & Stroke Research. Congratulations to Leanne Tuck, our top team fundraiser!

Thanks again for your support! We look forward to having you join us again next year!  
For more information on last year's walk, view our [newsletter](#)

**About Us:**

Jordan Engineering Inc. (<http://www.JrdnEng.com/>) is a group of Engineers and Computer Professionals who provide industrial software solutions. We work closely with your operations, maintenance and industry specialists to jointly develop a customized, user-friendly system with both long term and short term ROI. Our services include:

- PLC Programming
- SCADA & Website Design
- Customized Training
- System Integration
- Full 24 Hour Support

For more information about our services, please visit the [services](#) section on our website or contact [Sandra Murre](#) directly at:

**Jordan Engineering Inc.**  
**Phone: (905) 562-9797 x221**  
**Fax: (905) 562-1515**

4066 21st Street, Jordan Stn.  
Ontario, Canada L0R 1S0
